- Robust polycarbonate construction
- Ability to trigger preset on dome or PTZ cameras
- Manufactured in the UK

The Videoswitch Wireless PIR system includes a choice of detectors and a receiver that connects to a Videoswitch DVR. Up to 64 detectors communicate by wireless link to the receiver and require no wiring at all. The system is very easy to install and suits a wide variety of applications including perimeter fence protection, schools, commercial storage areas, construction sites, retail warehouse, showroom forecourts and container lorry parks. Alarms may be used to call up fixed views or preset positions and to make remote contact using email, text messages or calls to central site alarm monitoring software.
